

Enabling Smart Mobility.

Fluidtime

Gemeinsam für  
bessere Mobilität  
seit über 15 Jahren.

Play an active role in shaping tomorrow's mobility and contribute to sustainability.  
Become an important member of a team of dedicated software developers.  
We value different opinions and act together.  
We like to work and celebrate together, both virtually and in our loft office in Vienna's 7th district.

Join our team now and become part of Fluidtime as:

## DevOps Engineer

Place of employment: 1070 Vienna; 25 to 38.5 hours / Part-time or full-time; Immediate; Permanent

### Your tasks:

- Design, implement and maintain automation tools, processes and infrastructure to optimise the agile development cycle.
- Design and develop automated tools and scripts to enable repeatable processes such as deployment, testing, monitoring and scaling.
- Developing and optimising our CI/CD pipelines to enable developers to regularly integrate and deploy code into the production environment.
- Build monitoring systems to continuously monitor the performance of applications and systems. When problems occur, analyse data, identify bottlenecks and implement solutions to ensure reliability and performance.
- Work closely with developers and quality assurance.
- Actively contribute to the architecture of a complex software solution
- Become a valued member of a team of dedicated software developers in a company with a friendly working environment

### This job is perfect for you if you have:

- Solid IT knowledge (HTL, FH, University)
- A number of years of professional experience in the field of agile software development
- Excellent written and spoken German and English
- Experience with CI/CD pipelines (e.g. Jenkins, GitLab, ...)
- Experience with various build and deployment tools (e.g. Jenkins, Gradle, Fastlane, ...)
- Experience with architecture, maintenance and operation of container and cloud technologies (e.g. Azure, Docker Swarm, ...)
- Experience in maintaining, deploying and monitoring web services and database systems
- Experience with scripting languages (e.g. Shell, Python, Ruby, ...)
- Interest in current trends and long-term, continuous development of sustainable products
- Ability to work in a team, willingness to develop, sense of responsibility and reliability
- You value quality and accuracy, which is reflected in the way you work
- You like to take the initiative and drive issues that are important to you
- You are open to different opinions and enjoy working as part of a team

Ideally, you also have:

- Infrastructure as Code experience
- Experience with the operation of Java services
- Experience with monitoring, logging and configuration management tools (e.g. Nagios, Prometheus, Grafana, ELK-Stack, Ansible, ...)
- Experience with Azure
- Residence in Vienna or nearby

We are looking for people who are looking for a professional challenge and want to take on responsibility to make a difference.

As part of Fluidtime, you will benefit from flexible working hours and a generous home office arrangement. We cultivate a pleasant, open and above all friendly working environment so that working in your team is fun. We support this with a clear and efficient work structure, staff meetings and regular team events.

If you are ready to make a difference alongside other experienced engineers, we look forward to receiving your application by email at [jobs@fluidtime.com](mailto:jobs@fluidtime.com).

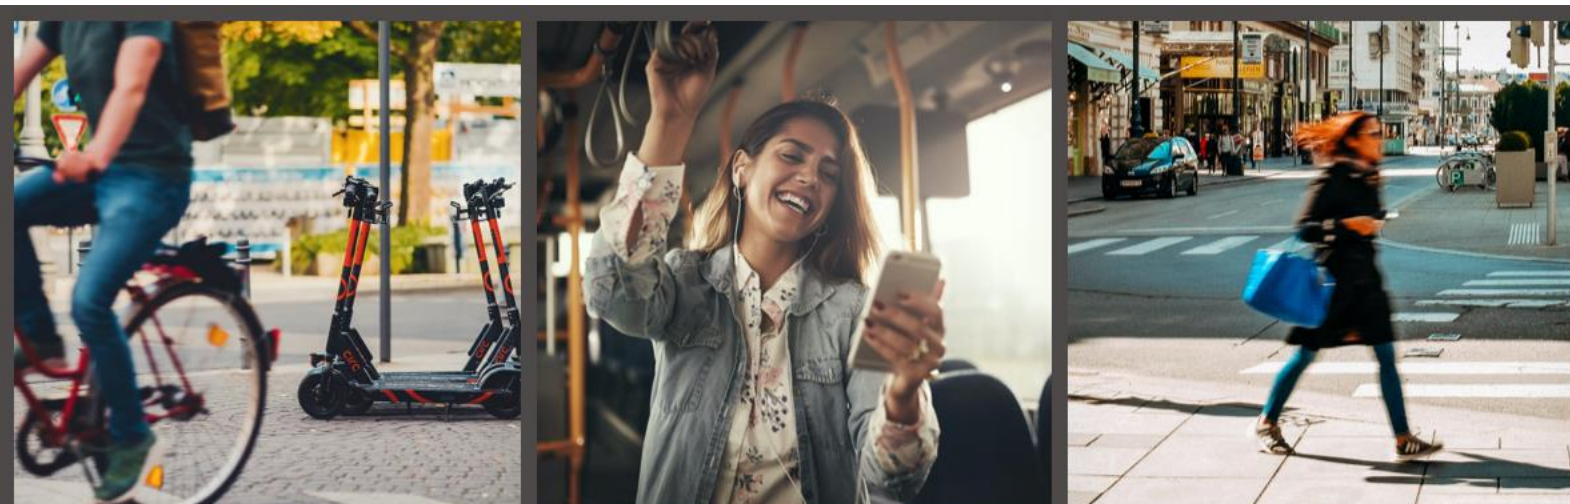

You can also visit us at [www.fluidtime.com](http://www.fluidtime.com).

Your contact person: Michael Tucek

The minimum salary for this position is EUR 3,455 gross per month for 38.5 hours. Actual salary will depend on qualifications and experience.

Not the right job for you? Maybe you have a friend who would be more suited to this job. We would be very grateful if you would forward this job offer to them. Thank you very much!

Write to us even if this job does not match your profile 100%. Simply send your unsolicited application to [jobs@fluidtime.com](mailto:jobs@fluidtime.com).
